Installation Immich-App

Immich – Installation (Minimal Setup)

```
cd /opt/docker
git clone https://github.com/immich-app/immich.git immich-app
cd immich-app
```

`.env` erstellen

Datei: `/opt/docker/immich-app/.env`

```
# You can find documentation for all the supported env variables at
https://immich.app/docs/install/environment-variables

# The location where your uploaded files are stored
UPLOAD_LOCATION=./library

# The location where your database files are stored. Network shares are not supported for the
database
DB_DATA_LOCATION=./postgres

# To set a timezone, uncomment the next line and change Etc/UTC to a TZ identifier from this
list: https://en.wikipedia.org/wiki/List_of_tz_database_time_zones#List
TZ=Europe/Berlin

# The Immich version to use. You can pin this to a specific version like "v1.71.0"
IMMICH_VERSION=release
```

```
# Connection secret for postgres. You should change it to a random password
# Please use only the characters `A-Za-z0-9`, without special characters or spaces
DB_PASSWORD=kdlIHdjdfifhj7f7ehekdhuvzdjenfifhHJZHGjdu65w7sh

# The values below this line do not need to be changed
################################################################################
DB_USERNAME=postgres
DB_DATABASE_NAME=immich
```

Starten

`docker compose up -d`

Aufruf im Browser

`http://<VM-IP>:2283`

Erster registrierter Benutzer = Administrator.
